

**RE: Tennessee Storm Water Multi-Sector General Permit for Industrial Activities (TMSP), Expiration and Reissuance**

The current TMSP expires on December 31, 2006. It is the Division of Water Pollution Control's (the division) intent to issue the new TMSP with an effective date of January 1, 2007. The division is currently in the process of drafting the new TMSP. Copies of the rationale, the draft permit, and the new Notice of Intent (NOI) will be posted on this website as they become available (likely late summer or early fall).

The division will also use an E-mail list to help keep current permittees up to date. All current permittees will automatically be included in E-mail correspondence if the permittee has an E-mail address on file with the division. If the division does not have your E-mail, or if you need to update or check the information on file, please contact one of the people listed below.

New Notice of Intent (NOI)

The NOI is a form used to apply for coverage under the new TMSP. The deadline for NOI submittal is 30 days after the effective date of the new permit. The division is currently not accepting renewal submissions. A new NOI will be prepared ahead of the general permit issuance time. When the new NOI is available, facilities will receive a partially completed copy of the new NOI asking the permittee to update any incomplete/incorrect information.

Additional Resources

TMSP guidance documents, links to relevant web sites, a copy of the blank NOI, a copy of "No Exposure Certification" memo, and examples of completed NOI forms (both for a large corporation and small business) are available on our web site: <http://www.tdec.net/permits/strmh2o.shtml>

Thank you for your time and interest in the TMSP.

Sincerely,  
Permit Section  
Division of Water Pollution Control
